Velours or Satin Practical: Lines Graceful and Clinging.

Separate Blouses and the Waistcoat Vogue-Models Destined to Complement Tailored Suit.

For early fall wear, before it is cold enough to don a winter suit, a coat dress is one of the most practical purchases. Fushioned of tricolette, of wool velours or tricotine, as well as heavy, double-faced satin, a dress of this type possesses the utmost distinction, and in its tailored simplicity is a compremise between the usual one-piece frock and the more conventional coat and skirt costume.

Just at present there are any number of interesting frocks of tricolette to be seen, and their clinging, graceful lines are most attractive. Some are almost sheathlike in their slimness, and it behooves a woman to be quite sure that she is properly corseted bemy kidneys acted normally. I am fore attempting such a gown, for there are no folds or draperies to camouflage discrepancies of figure.

Navy blue, black and a rich coppery brown are the colors which predomnate, and while some models show a lever use of extremely long fringe. others have just a bit of heavy slik braid about the neck or used for a sash.

Rarely is there a bit of white to relieve the severity of the neck line. This is a trying fashlon, but very smart. Sometimes serge or satin is combined with tricolette with excellent results. The foundation is of navy serge, and over this is worn a modifled tunic dress of navy tricolette stitched and showing novel touches in the cut of the sleeves and in the flaps, which are caught down by buttons of serge.

Once merely an integral part of the frock or blouse, the waistcoat has now become a decisive factor in determining the success of one's costume. Made of every conceivable material, it serves to break the exceeding simple, almost severe lines of our war-time frocks, and designers have shown great ingenuity and cleverness in planning and fashioning these little garments. They have gradually lengthened until now some reach almost to the knees, while others content themselves with stopping just below the walsiline. As a rule a material is chosen which in texture is a decided contrast to the gown itself. Jersey is placed with satin, chiffon with serge or pique, and linen with velour, and the effect is always delightful, especially when the trimming takes the form of conventional motifs done in old-fishioned embroidery stitches, chain stitching, done in wool or silk-the seed stitch of Chinese work, as well as odd designs carried out by couching or cross stitching.

Separate blouses have not escaped the walstcoat vogue, and there are some wonderfully interesting models destined to complement the tailored suit which once more is back in A finy bottle of Freezone costs but a favor. The interesting development of the output of apparel for autumn is the smart as the chemise frock. In truth fact that America makes a more definite change than does Paris. She advocates the frock with the insten length skirt. She even lowers the hem of her tailored suits for the street.

Paris does nothing of the kind. She takes advantage of the fact that the government demands less usage of wool in clothes and cuts her skirts to such a height that it is improbable an American woman would wear them, unless she is in uniform, driving an automobile or doing other active work. France, as was said before, put out

these short skirts with the plea that they were in co-operation with the government and that they were suggested by the short skirts worn by American women in the war service abroad; but those were uniforms that the American women wore. The French mind may not have grasped that we're not all in uniform over here and that those who do wear the regulation service costume have many other clothes in their wardrobe to which they resort as soon a: their war service hours are over.

Medievalism Still Rampant. We have worn atrociously short skirts, and even in the most polite circles, where one expected conservation,

PHYSICIANS ARE CALLED TOO SOUN

Not Necessary to Summon Doctor in Mild Cases of Spanish Influenza.

REST IN BED IS IMPORTANT

Acute Shortage of Medical and Nurs Ing Service Makes It Imperative That People Learn Something of Care of Sick.

Washington,-In an effort to reduce unnecessary calls on the over-worked physicians throughout the country because of the present epidemic of influenza, Surgeon General Blue of the United States public health service calls upon the people of the country to learn something about the home care of patients ill with influenza. Physicians everywhere have complained about the large number of unnecessary calls they 'ave had to make because of the inability of many people to distinguish between the cases requiring expert medical care and those which ould readily be cared for without a physician. With influenza continuing to spread in many parts of the country, and with an acute shortage of doctors and nurses everywhere, every unnecessary call on either physicians or nurses makes it so much harder to meet the urgent needs of the patients who are seriously ill. Present Generation Spoiled.

"The present generation," said the surgeon general, "has been spoiled by having had expert medical and nursing care readily available. It was not so In the days of our grandmothers, when every good housewife was expected to know a good deal about the care of the

"Every person who feels sick and appears to be developing an attack of influenza should at once be put to bowels have moved regularly, it is not necessary to give a physic; where a physic is needed, a dose of castor oil or Rochelle salts should be given. "The room should be cleared of all

unnecessary furniture, bric-a-brac, and rugs. A wash basin, pitcher, and slop bowl, seap and towel should be at hand, preferably in the room or just outside the door. "If the patient is feverish a doctor

should be called, and this should be done in any case if the patient appears very sick, or coughs up pinkish (bloodstained) sputum, or breathes rapidly and painfully.

"Most of the patients cough up considerable mucus; in some, there is much mucus discharged from the nose handle the long tunic at all, and yet and throat. The Wreck of Faith

By REV. J. H. RALSTON, D. D.

TEXT-When the son of man cometh.

as meaning that when Jesus Christ re-

shall he find faith on the earth?-Luke These words have been interpreted

> turns to this world that he will find no faith. They have been interpreted as being simply an inquiry, because of the teachings of the Bible and present world conditions as to faith at that time. In either case we have a wreck in view. whether real or imaginary. Faith may be

understood as the body of Christian truth given once for all in the first century, embracing the fundamentals of our Christian system-the infallibility of the Holy Scriptures, the deity of Christ, the lost state of man by nature, the only hope of recovery by the atonement of Christ on the cross, etc. This may be considered from the standpoint of the church in its visible form or that of the individual, personal interest in the subject being emphasized with reference to the latter rather than with the former. The aspect of the former, because it determines the aspect of the latter, shall have fuller treatment.

Faith has had a varied experience. For some three centuries it was held with comparative fidelity. Then the clouds of paganism and lust for embracing Christianity as an element of political life began to gather, For bed in a well-ventilated room. If his some centuries there was great darkness. In the period of the Crusades there were flickering lights. Then darkness came over Christian thought until the days of Huss in Bohemia and Wickliffe in England. Persecution in Bohemia and indifference in England soon brought another season of darkness, until in Germany, under Martin Luther, the light arose that has shone for four hundred years, and accounts for what we have of the true faith today.

Is the faith of the church, as such, a and drawing, bound confidently for a gasless Sunday." distant port? Or do we see that church hesitating, staggering in the midst of changing teachings as to fundamentals like the ship with contrary winds and laboring hard to avoid the rocks on which it may be a total wreck?

Is it not true that some denominations of Christians while still clinging good. It is shown on a great majority place in the sick room and should not ful men in some denominations are

Christ, and was thoroughly unhappy. This is an extreme case, but the writer has had many young people of liberal education give substantially the same testimony.

What is the somewhat remote rea son for this situation as to religious teaching? We must go to the land of Martin Luther. The work of corrupting the Bible had progressed until nearly all German universities and theological schools had repudiated the faith of Luther, although clinging to his name. Learned men said certain results had been attained and these results discredited the Bible. With amazing rapidity this conclusion took hold in England and Scotland and our own country. Destructive biblical criticism and Darwinian evolution swept over nearly all our great universities and our Bible was in the scrap heap. Those of us who have watched the trend of German theo logical teaching have observed a tremendous advance since the days of Schleiermacher, Baur and Hoffman to the days of Kuenen, Graf and Cornill. It was bad enough with the former, worse with the latter and the final plunge was made by men like Neitszche, who utterly ignored the Bible and defied God himself. Is it any wonder that Germany is suffering today, and is it much less wonder that the Saxon world is suffering likewise!

When will men learn wisdom? For the individual, especially respecting young people, the old-fashioned religion must come back. The old religious home must be restored. How many professedly religious homes are religious wrecks!

Back to God! Back to Jesus Christ! To thus get back we must get back to the Bible. Thank God it is being published as never before and the demand for it is beyond the supply. Thank God for this fact as to the hunger of the people for truth.

I freely admit that salvation is worth working for. It is worth a man's going around the world on his hands and knees, climbing its mountains, crossing its valleys, swimming its rivers, going through all manner of hardships in order to attain it. But we do not get it in that way. It is to him that believeth .- Moody.

To be little with God is to be little for God.

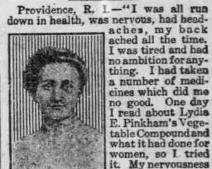

The only safe life is a saved life .--Douglass.

A Misnomer.

Dorothy had long wished for a kitten, and when Tip, her little dog, was killed by an automobile a kitten came into her possession, which she named Thomas. From a playful kitten he soon grew into a sturdy cat, the pet of the neighborhood. Loud was the mourning one day when Thomas disappeared. Three weeks later, a shout went up which caused the residents on Park avenue to hasten to their doors, and following in "his" wake with faltering footsteps were six kit-

TOO WEAK TO FIGHT

The "Come-back" man was really never down-and-out. His weakened condition because of overwork, lack of exercise, imtions of Christians while still clinging to orthodox creeds have abandoned those creeds in their teachings? Faithful men in some denominations are now crying to their brethren to suppress many of the church publications as they are distinctly infidel in their teachings. Is it not true that many hungry souls go to church and come away hungry because they have not heard the Gospel of Jesus Christ?

How about the individual? Not long ago a young man, who was a graduate of one of America's greatest universities and was finishing his second year in an orthodox theological seminary, said to the writer that he had lost his faith, had no confidence in the Bible, dld not accept the delty of Jesus Christ, and was thoroughly unhappy. This is an extreme case but the writer of these capsules each day will put a man on his feet before he knows it; whether his trouble comes from uric acid positioning, the kidneys, gravel or stone in the bladder, stomach derangement or other ailments that befall the over-zealous American. The best known, most reliable remedy for these troubles is GOLD MEDAL Haarlem Oil Capsules. This remedy has stood the test for more than 200 years since its discovery in the ancient laboratories in Holland. It acts directly and gives relief at once. Don't wait until you are entirely down-and-out, but take them today. Your druggist will gladly refund your money if they do not help you. Accept no substitutes. Look for the name GOLD MEDAL on every box, three sizes. They are the pure, original, imported They are the pure, original, imported Haarlem Oil Capsules.—Adv.
